PUBLIC LIBRARY.

REPORT OF THE TRUSTEES.

To the Mayor and Aldermen of the City of Concord:

The trustee of the Public Library have the pleasure of calling your attention to the annexed report of the librarian, and to venture to suggest that it furnishes ample proof of the successful administration of this department during the past year, so far as present conditions will permit. The librarian and her assistants are entitled to much credit for their persistent and skilful efforts in behalf of the library.

The trustees at their annual meeting in January voted to ask for an appropriation for the present year equal in amount to that of last year. A reduction of the appropriation would be unfortunate for the interests of the library.

Respectfully submitted,

REUBEN E. WALKER,
President, Board of Trustees.

February 1, 1917.

REPORT OF THE CITY LIBRARIAN FOR 1916.

To the Board of Trustees of the Concord Public Library:

GENTLEMEN: An annual report should be history rather than fiction, and as 1916 was an uneventful year at our library, this report will necessarily be brief.

The city government favored us with a larger appropriation than usual and we were, therefore, able to buy 1,125 volumes as against 885 in the previous twelve months. Of these 1,125 books, 730 were new titles, 235 were replacements, 160 were duplicates.

We acquired 75 more volumes in bound periodicals; as always we received publications from institutions and societies, and a few works from their authors; Abba Goold Woolson, Rossiter Johnson and Scott Nearing thus remembered us in 1916. A number of books on the war sent by Sir Gilbert Parker to the Y. M. C. A. have been handed over to us. The late Giles Wheeler directed that we be given some of his valuable manuscript papers relating to Concord history and genealogy. To Mrs. H. H. Wright we are again indebted for many stories which meet with brisk demand.

We discarded 398 worn-out volumes; the net gain to the library was 802 volumes, which added to the 29,378 already on our shelves, brings the total number of volumes, December 31, 1916, to 30,180. I am grateful to Russell Cushing and Foster Sturtevant for the time they spent in examining our mechanical and electrical books, with subsequent advice as to which ones were too antiquated to be worth keeping.

The cost of books is rising appreciably owing to scarcity of paper, and this fact will have an effect on our purchases in 1917. Lead also has gone up, and we now have a care that the writing-pads and pencils put out for use in the reference room are not wasted.

Our total circulation during the year was 94,927 volumes, of which 88,187 were charged at the desk for home reading, and 6,752 were consulted in the reference room: or, more strictly speaking, 6,752 persons came to Miss Brown with questions and to the majority she showed more than one book in answering their inquiries. We have filled 25 out-of-town applications for material on widely differing subjects, such as, drama, dynamos, birds, South America, psychic phenomena and manual training.

It is interesting to note how a change in the school curriculum alters the line of books asked for: for instance, local history which was studied so ardently that we were driven to making a detailed index to Bouton's History of Concord is now dropped, and pupils call for data on commercial topics. I should like to mention the very intelligent use by members of the Music Club of books bearing upon the composers and works on their program for the season. For a score of years interest in standard authors has languished, and we have been gratified to see this revived by Professor Childs's course of lectures.

Notwithstanding that six books were stolen in three weeks from our new-book rack, we have continued the changing display there, because nowhere else in town can a person who really cares for literature drop down and examine a dozen recent inspirational, instructive or clever works in prose and poetry: the taking away of this privilege would be felt by some of the live minds in our city. Inferentially the thief was one of our better read citizens, for he purloined "Present Day China," "Our First War with Mexico," "The Lion's Share," "A Country Chronicle," "Ambulance No. 10," "The Third French Republic."

As in previous years I have attended library conferences here and there to avoid getting into a rut professionally.

The appointment of Miss Ruth Chase on the staff has been a benefit as lessening the strain of labor on the three faithful assistants of long standing.

The Concord public, the trustees of this library, and my co-workers unite in making the years pass without friction and with good results.

Respectfully submitted,

GRACE BLANCHARD,
City Librarian.

HEALTH DEPARTMENT.

REPORT OF THE BOARD OF HEALTH.

To the Board of Mayor and Aldermen:

The Board of Health submits the following report for the year ending December 31, 1916. The organization of the Board was as follows: Mayor Hobbs, *ex-officio*, chairman; Dr. Charles H. Cook, city physician, secretary, and Dr. Fred A. Sprague, member. Dr. Charles Duncan was appointed milk inspector for the year and Mr. Charles E. Palmer was sanitary officer. Regular meetings were held on the first Monday of each month at 4 o'clock, p. m. These meetings were well attended and much interest was shown by the members in the matters presented for discussion.

At a conference between the medical members of the Board of Education of Union School District, Dr. E. E. Graves, Health Officer at Boscawen, and the medical members of the Board of Health, some changes were recommended in the rules and regulations pertaining to contagious disease in its relation to school attendance. These changes were approved by the full Board of Health. At the same time other changes seemed advisable in the Rules and Regulations concerning contagious diseases and vaccination. Accordingly, the whole code was revised and it was thought made to conform with the most recent ideas of epidemiological science. The Rules and Regulations as revised were submitted to your Board and by your approval became operative September 11, 1916.

In the latter part of May this Board, accompanied by Sanitary Officer Palmer and Superintendent Sanders of the Water Department, made a careful sanitary survey of

the catchment area of Penacook Lake. There was very little chance for criticism. However, it was suggested to Mr. Tandy of the State Hospital that a septic tank be installed at one of the cottages and a concrete container for the manure at Sunnyside Farm. Mr. Tandy expressed himself as willing to undertake these improvements and a subsequent inspection of the premises by the Board showed that they had been made as suggested. It is believed that all danger from that quarter has thus been removed. The recent purchase of the Crowley property at the head of the Lake by the Water Board is strongly commended by this Board. Another possible source of slight contamination is thus removed from the catchment area.

Owing to the epidemic of infantile paralysis during the summer and fall it was thought best to take some steps to prevent the dreadful malady from gaining a foothold in our community. Accordingly, some rules were drawn up which it was thought might serve a useful purpose without imposing hardship on any person concerned. Some opposition was expected and encountered, but by far the larger portion of the community were anxious to cooperate in our efforts to keep the plague away. One of our leading daily papers is an editorial relative to the opposition to the regulations ended by saying it thought it was "better to be safe than sorry." This was the key-note to the Board's action in the matter very tersely expressed. Only one case of this disease was reported during the year.

With respect to diphtheria we were not so fortunate, 54 cases having been reported during the year. This number is considerably in excess of the average and is doubtless accounted for in a large measure by the mildness of the cases. Many of these mild cases were doubtless not seen by a physician and, being allowed to go at large, were constantly infecting others. In one instance the attention of the Board's physician was called to the fact that there was sickness in a family living near a quarantined case. In searching for the source of contagion this family was investigated and cultures taken. Two of the children were

thus found to have diphtheria in the convalescent stage. This family had called in a physician who, owing to the mildness of the symptoms, had failed to make a diagnosis. This instance forcibly illustrates the vital necessity of taking cultures from the noses and throats of all sick children during the prevalence of diphtheria. Indeed, when there is the slightest doubt as to the *exact* nature of the trouble it is a good rule to follow at *all* times.

Many cultures were taken from the throats and noses of school children by the city physician, and in this manner several "carriers" were detected. If parents would take the trouble to note the slight ailments (colds, sore noses, sore throats, feverishness, etc.) of their children, seeking the advice of a competent physician immediately, most outbreaks of contagious disease would be short-lived.

Every practicing physician in the community is morally an unofficial member of the Board of Health and as such has definite duties to perform. One of these duties is to educate his patients along the lines outline above. Another duty is to furnish all possible information and coöperation to the official Board of Health. If a physician makes a sweeping statement that "the Board of Health is at fault because we are having so much diphtheria," it is not apparent just how the community is benefited by the impeachment. On the other hand if he comes over to the office with some useful advice, information or criticism he will be doing a real service. It is hoped more of the "unofficial members" will come in and qualify during the next year.

The reports of the sanitary officer and the milk inspector are appended to and made a part of this report, and should be consulted for details of the department's activities.

Respectfully submitted,

NATHANIEL W. HOBBS,
CHAS. H. COOK,
FRED A. SPRAGUE,
Board of Health.

REPORT OF THE MILK INSPECTOR.

To the Board of Health:

GENTLEMEN: The examinations of milk made by the inspector appear in another part of the Board of Health report. All examinations except one, a sample found to be watered, were well up to the standard required by law, barring one or two samples which showed considerable dirt.

During the year the changes in ownership of the different milk routes of the city have caused considerable unrest among the consumers and bother to the department. These changes are a result of the small profits the men enjoy as a result of the high price of feed and the scarcity of cattle as a result of the European war but in spite of the changes among the retailers the farms that supply our milk are practically the same as last year.

The price of milk has increased one cent a quart; this fact brings no complaints as people realize that it is in line with the increased cost of all other foods. It is still true, however, that milk is the cheapest food we enjoy for price paid, nine cents a quart.

The care of milk sold in Concord is a credit to the producers. There are many farms now that have conditions which are beyond just criticism; namely, a room with cement floors, away from the barn, where the milk is taken, cooled and put up in bottles washed and sterilized by steam. Here the milk is stored in cement troughs thoroughly iced till ready for delivery. Besides all this the herd that supplies the milk is housed in clean, well ventilated barns.

The policy of the inspection work will continue the same as that laid down in previous reports. There is the best of coöperation among all concerned in the handling of milk. The association of milk men at the annual meeting has good, healthy discussions of everything pertaining to the

business and gives the inspector every support in bringing about needed changes that will help the consumer.

The bottling of all milk is a betterment we are hoping for in the near future when the business is more settled. This has the support of most of the men in the business and is looked forward to as a needed step in advance.

Respectfully,

CHARLES DUNCAN,
Milk Inspector.

REPORT OF THE SANITARY OFFICER.

To the Board of Health:

GENTLEMEN: Herewith is submitted the report of the sanitary officer for the year ending December 31, 1916, with tables showing the work of the department.

There were 467 deaths during the year, one more than in 1915, and organic diseases of the heart caused the largest number of deaths, 79, or 17.36 per cent of the total number, excluding stillbirths. Two hundred and twenty-four deaths occurred in the different wards of the city and 243 at the public institutions. Estimating the population at 22,000 and excluding the non-resident deaths, 173, and the stillbirths, 12, this gave a death-rate of 12.81. Transit permits were issued for the removal of 167 bodies to other places for interment, and burial permits were granted for the interment of 88 bodies brought to Concord from out of town.

The total number of cases of contagious diseases reported were 468, with 7 deaths. An epidemic of measles brought the total number of cases to 382. Included in this number were 65 cases at St. Paul's School. There were 54 cases of diphtheria including 4 carriers and 42 of these cases were reported after the first of September, a majority being school children. Three carrier cases were detected by Doctor Cook in the schools and the children were sent home and the school rooms disinfected. The fatalities from diphtheria totalled 4. There were 18 cases of scarlet fever during the year with no deaths. Concord was remarkably free from typhoid fever there being only 8 cases reported with one death. We were very fortunate during the outbreak of infantile paralysis in other communities to have only one case. Every precaution was taken to safeguard the health of our citizens. Whooping cough caused one death and there were five cases reported.

Numerous complaints of various character were received during the year and each given attention. These complaints were due largely to dead animals, the keeping of hens and pigs, odors from stables, the throwing out of slops, swill and rubbish, uncleanly condition of premises and yards, plumbing out of repair or in an unsanitary condition, broken catch basin traps, offensive privy vaults and odors from various causes. Inspections were made from time to time of the alleyways in the rear of the business blocks and proprietors of stores and markets were requested to keep the rear of their establishments free from objectionable rubbish.

Inspections were made during the summer of the stone sheds and in a number of cases notices were served to owners to improve the sanitary conditions.

Several inspections of Long Pond were made and all suggestions mentioned by this department were carried out satisfactorily. The shores were never in better condition and the city's water supply well protected.

With so little building during the year there was less plumbing installed than in former years, but water tests were made of all new work and 97 permits were granted.

All public halls were inspected the latter part of the year and numerous improvements were suggested for the improvement of conditions in toilet room as well as in the general cleanliness of halls and ante-rooms.

Sixty-one milk farms were visited and many improvements noted. A number of improvements were suggested which if carried out will bring still greater improvement.

Our appropriation for the year was \$3,400.00 and the total expenditures were \$3,122.03, leaving a balance of \$277.97. The expense for the care of contagious disease patients was \$346.37, a majority of the cases requiring assistance by this department during quarantine being cared for at the Foster Ward, Margaret Pillsbury Hospital. The cost for fumigation supplies was somewhat more than in former years owing to the advance in the price of material used. Two hundred and six dollars and ninety-five cents

was received for milk license fees and \$2.50 from the sale of fumigation supplies.

I wish to express my thanks to the Mayor and the other members of the Board of Health, the members of the city government and all the city officials who have rendered assistance to this department during the year.

Respectfully submitted,

CHARLES E. PALMER,
Sanitary Officer.

FINANCIAL STATEMENT OF THE BOARD OF HEALTH FOR THE
YEAR ENDING DECEMBER 31, 1916.

APPROPRIATION.

Salary, sanitary officer,	\$1,500.00
Salary, milk inspector,	300.00

People run into by autos,	6
Complaints of horses and cows in the street,	12
Complaints about boys sliding on the sidewalk,	13
Autos run into teams,	7
Boys breaking windows,	15
Animals reported to S. P. C. A.,	7
Officers assisted at drowning accidents,	12
Parents abusing children,	1
Lights reported out by police,	406
Out-of-town runaway boys detained and sent home,	1
Out-of-town runaway girls detained and sent home,	1
Merchants notified of trouble in their stores, nights,	17
Fire alarms rung in by officers,	1

LOCATION OF POLICE SIGNAL BOXES.

- Box 1. Bridge Street and Stickney Avenue.
- Box 2. South Main and West Streets.
- Box 3. South Main and Concord Streets.
- Box 4. South Main and Pleasant Streets.
- Box 5. North Main and School Streets.
- Box 6. North Main and Park Streets.
- Box 7. Washington, between North Main and State Streets.

- Box 8. North Main and Church Streets.
- Box 9. North State and Penacook Streets.
- Box 10. Curtice Avenue and North State Street.
- Box 11. West Concord, opposite Shepard's store.
- Box 12. Penacook (square).
- Box 13. Center, opposite Union Street.
- Box 14. South and Perley Streets.
- Box 15. Broadway, corner Carter Street.
- Box 16. Center and Pine Streets.
- Box 17. Pleasant and South Streets.
- Box 18. School and Giles Streets.
- Box 19. Beacon and Rumford Streets.

RECOMMENDATIONS.

I renew my recommendation that a suitable room be constructed for the detention of women and juveniles, and that the old ward room be remodeled into a guard-room for the officers.

I wish to thank His Honor, Mayor Nathaniel W. Hobbs, and the Honorable Board of Aldermen for their courteous treatment and support. I desire to thank His Honor Judge Clark, City Solicitor Alexander Murchie, County Solicitor Robert C. Murchie, Clerk of the Court Allan Robinson, and all others who have assisted this department during the year. To the officers of the department, I extend my appreciation for their hearty coöperation and faithfulness.

Respectfully submitted,

GEORGE A. S. KIMBALL,
City Marshal.

REPORT OF THE BOARD OF PUBLIC WORKS.

REPORT OF THE HIGHWAY DEPARTMENT.

To the Board of Public Works:

GENTLEMEN: In presenting the annual report of the work of the highway department for 1916 I will say that there never has been a time when it has been so difficult to accomplish the necessary work as in this past year. Sufficient suitable labor could not be found and it was impossible to obtain crushed stone and other road materials when needed. In several instances we were obliged to stop construction work on account of shortage in road materials and delays in shipping, etc. This was not only annoying, but expensive, and prevented the department from doing all the work that had been planned for the year. It made it very evident that storage bins for stone and tanks for road oils would be very practical.

I do not consider that the highway department is properly and adequately equipped to perform the work required as promptly and efficiently as it should. We need some good horses. We have taken over several from the fire department and while we have been able to use them to better advantage than the fire department could have, still they are not first-class horses. There are times during the year when a truck cannot be used to as good advantage as horses but we need a light truck for emergency and repair work. There should be a new crusher, tar heater and a number of pieces of equipment added which would enable the department to perform the required work in a more up-to-date manner. And there should also be more shed room on the city lot to house the equipment. I called your attention in last year's report to this matter of shed room

and crusher. It is too expensive to repair the old crusher any longer and it does not do the work required. We certainly need a new one.

For permanent work in 1916, Park Street from Main to State, South State from Fayette to Monroe, North Main on the west side from Pitman to Center were macadamized, North State Street from Call to Penacook Street reconstructed, a section of Pleasant Street near Pleasant View resurfaced and a portion of Washington Square in Penacook concreted. Sections of South, South Main and Penacook Street were to have been macadamized but the work could not be done owing to the difficulty of securing labor and materials. Neither were we able to complete the work on North State Street and from the cemetery to Penacook Street only one half of the roadway was rebuilt.

I would recommend that next year North State Street and those other streets on which the work planned was not done be finished. There is but one section of Main Street through the business part that is not concreted, that being the east side from Park to Center. The granite block paving there is very rough and it should be removed and the street concreted. South State Street from Monroe Street south should be macadamized. Warren Street was macadamized a number of years ago and the constant traffic which that street receives has worn it badly and it should be reconstructed from Spring Street west. I believe that the petition for improving Auburn Street which was received this past year was considered and it was decided to do something there another season. However, I would not recommend laying out too extensive work in the line of permanent improvements as we shall doubtless have as much difficulty in obtaining materials and suitable labor as last season.

A number of streets received surface treatment and a good deal more should be done in that line next summer. We received \$760.13 from the state for maintenance work on the trunk lines.

The usual amount of miscellaneous work has been done

by the department during the year. Quite a number of street signs have been put up and we are making special effort to get all streets properly marked. No large number of petitions for new concrete walks were received but the calls for repairing concrete walks are increasing every year. Several new catch basins were built and frequent showers made it necessary to clean them all several times during the summer.

Some of the new bridges that were recently erected are much in need of painting, especially the Pembroke bridge. The plank for the new floor of the Loudon bridge has been received and work will be begun there as soon as weather permits.

The demand for driveways is the source of much trouble for the department. Whenever possible we have avoided putting in pipe driveways as they are constantly freezing up in winter and becoming filled during the summer months and in heavy rains flood the street and do considerable damage.

Not as much work was necessary on trees last year as previously. We find that the brown-tail moth is disappearing but the number of gypsy moth nests is increasing. Nevertheless, the appropriation allowed some work to be done in planting trees. Only fifty were set out but if the work proves at all successful we hope to plant more another season.

Oil was used again for dust laying last summer and I recommend its use another year.

The use of a truck for collecting garbage has proved both practical and efficient. During the winter months when the snow is quite heavy we find it better to use the teams instead of the truck. During that time the truck is thoroughly overhauled and is kept in good condition for service.

For their continued interest in the work of this department I wish to thank the members of the board.

Respectfully submitted,

ALFRED CLARK.
