Your Committee were much pleased with the appearance at the Farm, both in doors and out. The inmates are most of them quite old or very young, but both old and young looked neat and comfortable and appeared to enjoy themselves under the care of their mild but stern Matron, and we feel confident that the Farm has never been more judiciously managed than it has the past year by the Superintendent and Matron, Mr. and Mrs. Gilman.

The inventory is somewhat larger than it was last year, which is accounted for from the fact that hay and all kinds of grain and stock are much higher than in former years.

HENRY MARTIN, JOHN V. ALDRICH, JOHN P. LOCKE,	}	<i>Committee.</i>

24. Alarm by burning chimney, on West street.

Notwithstanding what has already been done in the supply of water and apparatus, still we have not kept pace with the growth of the city, and appropriations are still needed for the supply of reservoirs. No part of the main village should be without reservoirs within one thousand feet of each other. It is taxing the capacity of the Steamer (which is one of the first class engines) too

much to attempt to play two streams more than that distance and the hand engines more than five or six hundred feet, on level ground. The high ground west of Spring street, now nearly covered with elegant and costly houses, is the most deficient of any part of the city. This fact has been forcibly brought to our mind by the recent fires on Liberty street, and at the beautiful residence of George Clough, Esq. The water for the first being forced all the way up hill, at least 1.000 feet, and for the latter more than 2.000 feet. There are also other localities where reservoirs are very much needed. We never can be well supplied with water until means are taken to bring it from some place outside of the Centre village. The water from Little Pond, so called, if brought here in pipes of the proper capacity, being elevated so high above the level of the streets, would possess nearly force enough for the extinguishment of fires almost without the use of engines. The increased rate of insurance from this cause alone, is a matter of no small consequence to our citizens.

We are also in need of new hose. Much of what we have on hand has been in use from ten to twenty years, and has become rotten or worn out, and is not safe; always liable to give out when we most need it.

The Steamer purchased some two years since, and now in use, has satisfied every one of the utility and economy of its purchase, and it is the opinion of the Board of Engineers, that at no distant day, perhaps the present year, another Steamer of the 2d class, much smaller and lighter than the "Governor Hill," should be procured.

The members of the several Fire Companies have been very prompt and efficient during the past year. The only rivalry among them being which should be first at a fire, and most efficient when there.

The utmost harmony prevails throughout the entire Department, and at no time for the last twenty years have they been more deserving of the confidence of the community than at the present time.

The Board of Assistant Engineers have been assiduous in their endeavors to make the duties of the Chief Engineer as light and pleasant as possible, for which they will receive my most sincere thanks.

The Fire Police, recently organized in this City is a great auxiliary to the present Fire Department, the need of which has long been experienced.

Respectfully submitted,

TRUE OSGOOD, *Chief Engineer.*

Of the above cases, 168 were arraigned before the police court, and were discharged, convicted or bound over to appear at the next trial term of the Supreme Judicial Court for the following offences, to wit :

Horse stealing,.....	1

 168

It will be seen by the above, that the year just closed has been one of labor and toil for the officers of the city, and with the limited number of officers under pay there has been a large amount of work for me to attend to. The prevailing crime in this as in all other places, for the last year, is that of intemperance, and more arrests are made for that offence than any other, while the opportunity to purchase strong drink has been so abundant. It is an undeniable fact that the use of intoxicating liquors is the cause of much of the crime and suffering in our midst. We have what are called temperance men among us, but they are not willing to go forth and battle for the suppression of this great evil by publicly lending their aid and influence to the officers in the prosecution of cases, but when that assistance is given the officer, rum-sellers will leave the traffic and take up some honest calling.

The juvenile portion of the community furnish a large amount of police labor. Complaints are made almost daily against small children charging them with the commission of offences. To dispose of such cases is no easy matter. A night in the lock up generally suffices for the punishment of such youthful offenders for a time. A want of parental care and discipline is one great reason why such complaints are so numerous. Children who are allowed to absent themselves from school, and spend their time in roaming about the streets or loitering in public places can hardly be expected to do otherwise than evil. Much more ought to be said but space will not allow it.

Respectfully submitted,

J. L. PICKERING, *City Marshal.*

REPORT OF THE TRUSTEES OF THE PUBLIC LIBRARY.

The Trustees of the Public Library, in Concord, would respectfully submit the following

ANNUAL REPORT :

Notwithstanding the excitement occasioned by the great national struggle which has been going on during the past year, the Library has attracted to the enjoyment of its benefits more readers than in any previous year of its existence.

It now contains four thousand volumes. The addition by purchase during the year just closed has been two hundred and thirty-nine volumes, and by donation thirty-four volumes, which were received from the following persons: From Hon. E. H. Rollins, nine vols. public documents, and twenty-nine vols. of the Congressional Globe; from Mrs. J. A. Eames, two vols.

The number of subscribers has been seven hundred and twenty-three, being an increase of fifty-four on that of the previous year.

The financial condition of this institution will appear more fully on reference to the report of the Treasurer, and is good; but the Trustees are deeply sensible that the Library accomplishes but little good in comparison with what it would with larger means at its disposal. The City Government has continued to foster this educational influence by the exercise of a wise liberality.

When the great burdens now resting on our city shall cease to tax so heavily its resources, it is hoped that larger appropriations can be made, and the Library come to be, at no distant day, a fountain from which shall flow forth elevating, enlightening and refining influences among all classes of our citizens—an institution to which they shall point with pride and gratitude forever.

The sum of one hundred and seventy-five dollars is now invested in catalogues which remain unsold. Each subscriber should *own* a catalogue, and not use a *borrowed* one, as is at present done by

many; and it is suggested that every friend or subscriber would do a commendable act by purchasing a catalogue, and thus furnishing that large sum of money to be invested in new books which is now lying idle in the catalogues.
