CONCORD FIRE-ALARM TELEGRAPH.

For the purpose of uniformity in numbering the fire-alarm boxes, the city is divided into four districts, viz.,—

DISTRICT 1. Embraces that section of the city north and west of Washington street, box 17 of this division being located on the *south* side of the street.

DISTRICT 2. Embraces all between School and Washington streets.

DISTRICT 3. Embraces all between Pleasant and School streets.

DISTRICT 4. Embraces all south of Pleasant street.

The first figure of the box number will indicate the district.

SPECIAL NOTICE.

The fact that an alarm-box is located near their residences, and the places where the keys are kept, should be known to all persons, both male and female; and the simple manner of giving an alarm, in case of fire, should be a matter of common education. The Committee on Fire Department recommend to all persons who may see this notice, that they make the necessary inquiries, to enable them, in case of need, either to get the key and pull the box, or to direct others to do so.

In case of fire, follow these

DIRECTIONS.

Get the key to the nearest box to the fire.

Open the box, pull down the brass hook once only, and let go. This will set the clock-work of the box in motion, and the alarm will be given on all the bells connected by wire. Suppose box 25 has been pulled; the blows upon the bells will be given thus: 1—1 (two blows), then a pause of four or five seconds, and then 1—1—1—1—1 (five blows), making 25, then a pause of about fifteen seconds. This is repeated four times. If this is not considered sufficient, another pull of the hook will give the alarm four times more.

CAUTION TO PERSONS HOLDING SIGNAL KEYS.

1. Never open the box or touch the apparatus except in case of fire.
2. Never sound the alarm for a fire seen at a distance.
3. Be reasonably sure there is a fire before sounding the alarm.
4. Never give an alarm for a chimney fire unless there is imminent danger of the building catching.
5. Never give an alarm from any other than the box nearest the fire.
6. If possible, always give the alarm yourself.
7. Never allow your key in the hands of untrustworthy persons.
8. If you remove from your house or place of business, return the key to the chief engineer without delay.

REGULATIONS
OF THE
CONCORD PRECINCT FIRE DEPARTMENT,

ADOPTED BY THE BOARD OF ENGINEERS, JANUARY, 1874.

ARTICLE 1. Any engine or hose company, running out a line of hose from a hydrant or steamer, shall be entitled to the pipe, although the hose of other companies may be attached in order to reach the fire; and any company coming to a fire, and finding an incomplete line of hose laid out from a hydrant or steamer, shall attach to and lengthen out such line, in lieu of laying a line of its own.

ART. 2. When two or more engine or hose companies are playing in a continuous line, the pipe shall belong to the company attaching to the hydrant or steamer, as provided in the foregoing article; but any company furnishing the *entire* line, and receiving water from a steamer, the pipe shall belong to such company so receiving.

ART. 3. Each engine and hose company shall have equal claim to the hydrants; but it is enjoined upon the engine companies to draught their own water from a reservoir, wherever a suitable one can be found within a reasonable distance.

ART. 4. No company shall take possession of a hydrant or reservoir, unless their hose and apparatus for attaching to the same are at hand and ready for use. The company which shall be thus ready shall be entitled to such hydrant or reservoir; but, upon the order of an engineer, another

company may attach a second line of hose from such hydrant or steamer, in case the same may be necessary,—such company having first laid its hose, and being ready to attach the same.

ART. 5. In proceeding to, working at, or returning from fires, noisy demonstrations are strictly prohibited, and it is required of officers of companies to maintain perfect order and decorum in their respective commands during all such service.

ART. 6. No company, while returning from a fire, will be allowed to proceed faster than a walk, and at all times to keep on the right of the street. Drivers are strictly enjoined, in proceeding to a fire, to use the utmost care and caution consistent with promptness. Racing between companies is forbidden, under any circumstances. Any collision or casualty occurring to horses or apparatus will be considered a sufficient cause for the suspension of the driver in charge at the time.

ART. 7. No member of any company shall leave the city without first informing his foreman ; no foreman or assistant engineer, without first notifying the chief engineer,—in each case the party so leaving providing a substitute.

ART. 8. In case of fire, the foreman first arriving shall be in command until the arrival of an engineer.

ART. 9. Any order issued by the chief, or an assistant engineer, shall be promptly obeyed.
