## REPORT OF COMMITTEE ON FINANCE.

---

The books of the city treasurer have been examined and compared with those of the city clerk by the Committee on Finance, and all the accounts are found to be correctly kept, with proper vouchers on file for all payments. All the bills allowed by the Committee on Accounts and Claims have been paid, and no claims against the city which the city would be liable to pay are known to remain outstanding, with the exception of those mentioned under the heading of unfunded debts; and the balance in the hands of the treasurer is forty-seven thousand nine hundred and four dollars and sixty-six cents (\$47,904.66).

## CITY EXPENSES .

FROM JANUARY 1 TO DECEMBER 31.

**1886:**

*Being an itemized account, made up from the books of the City Clerk, of the payments made by the City Treasurer, on account of*

**RUNNING EXPENSES.**

The arrangement of the details of expenditure which follows is intended to furnish such information as is desired by the public, and is in accordance with suggestions received from various sources. Items of payment to the same individual at sundry times are included in the aggregate amount given, if paid for the same objects. Every effort has been made to ascertain and pay all the bills for the current year; and in all cases, so far as known, payments of rent, etc., have been made to December 31, 1886, and salaries and committee service have been paid for the full municipal year. The expenses of the year which are included in the general running expense, may be seen in the aggregate at the end of the detailed account here given. This is intended to include interest, but not the payment of maturing bonds.

## SUMMARY OF STATISTICS.

---

### Concord, New Hampshire, Water-Works.

---

Population of city by census of 1880, . . . . 13,845

Population of that portion of the city included within  
the water precinct, estimated, . . . . 12,000

Date of construction, 1872 ; additions since.

Works are owned by the city.

Source of supply, Lond Pond, a natural body of water containing 265 acres, situated about three miles and a half from the state-house, and about 125 feet higher than Main street in front of the state-house.

Mode of supply, gravity.

## FINANCIAL.

### MAINTENANCE.

<b>Receipts.</b>	<b>Expenditures.</b>
From consumers (mostly for domestic uses and at fixed rates), . . . \$27,451.33 From city water pre- cinct, for use of hy- drants, . . . . . 3,180.00 From rents, &c., . . . . . 231.31 From cash on hand at the close of 1885, . . . 1,972.58 <hr style="width: 20%; margin-left: auto; margin-right: 0;"/> \$32,835.22	For management and re- pairs, . . . . . \$3,142.03 For new distribution pipes, . . . . . 3,779.27 For new service pipes, . . . 767.50 For land purchased, . . . . 1,500.00 For interest on bonds, . . . 22,720.00 Balance carried to next year's account, . . . . . 926.42 <hr style="width: 20%; margin-left: auto; margin-right: 0;"/> \$32,835.22

### CONSTRUCTION.

No separate construction account has been kept. The works have cost about \$425,000. Of this sum, \$393,000 was raised from the sale of bonds of the city: \$350,000 of these bonds bear six per cent. interest, and the balance four per cent. The remainder of the cost of the works has been paid in part from the income, and in part by taxation. It will be noticed that items properly chargeable to construction account are included in the expenditures of the present year. Similar expenditures have been made each year.

We have made some changes in the form of our report to comply with suggestions made by a committee of the New England Water-Works Association at a recent meeting. We hope to further comply with those suggestions in future reports. Much valuable knowledge can be acquired from the united experience of a large number of corporations engaged in supplying water to the public. The only way to make this experience available is to have the reports of such corporations made upon the same general plan, and have the more material statistics condensed into convenient summaries. We shall cheerfully do what we can to promote this means of knowledge.

The board has purchased during the past year a tract of land containing about fifteen acres, situated upon the southerly side of Long Pond. It seemed important that the city should control this land, and thereby prevent it from ever being used in a manner that will pollute the waters of the pond, or otherwise interfere with the valuable and vital interests that the city have in the pond and its surroundings. Its cost was \$1,500, and has been paid from the income.

A substantial fence has been built upon each side of the road-

way across the dam at a cost of \$500, also paid from the income. Quite large extensions of the works have been made during the year, as will be seen from the superintendent's report. These became necessary in order to properly supply citizens of the precinct residing in those localities. They are also a part of the works as they were originally planned.

It is the policy of the board to furnish all citizens within the precinct with equal facilities for the use and enjoyment of Long Pond water, so far as is practicable. Of course this cannot all be accomplished at once; but the works are gradually approaching completion.

The enlargement of the water precinct by adding the village of West Concord thereto necessitates the extension of the pipes to and through that village. The board will commence work upon this extension as soon as the spring opens.

Application has been made by the authorities of St. Paul's School for a supply of water to its buildings. The board cannot undertake to do this so long as their buildings are not within the precinct; but if the precinct is further enlarged so as to include them, this application will be considered.

The demand for the water increases each year. New consumers the past year have increased the revenues of the works some \$1,600. It is evident that the time is not far distant when it will be necessary for the city to own all the water rights pertaining to the pond. The ownership of all those rights will add very materially to the usefulness of the works. The water can then be controlled so as best to supply the necessities of our citizens. Our city is prosperous and growing. The introduction of Long Pond water has been an important stimulus of this prosperity and growth.
