ADDENDUM NUMBER FOUR

B46-10

RECONSTRUCTION OF US ROUTE 3 (NORTH STATE STREET) PHASE 3 LAKE STREET TO PALM STREET, CONCORD, NH

TO ALL FIRMS OF RECORD: This addendum forms a part of and modifies the bidding and contract documents and technical specifications for the project named above. The following changes, additions and clarifications are made to the original Contract Documents:

1. **Question:** The term "Concentric Structure" seems to have been eliminated from the General Plan pages 1,3,4,6 & 10. Does the term "Concentric Structure" remain on the structure tables of General Plan pages 2, 5, 7, 8 & 9 or is the intent to remove that term , **also include** these pages?

Answer: At the pre-bid meeting, attendees were informed that due to AutoCad limitations on drainage system labeling, concentric structures were shown as a default setting while it was not necessarily the intent of this contract to limit all structures to concentric openings. Revised sheets provided indicated that revision to the plans. All sheets will eventually be revised for release for construction. The intent is not to limit the contractor to concentric openings on the drainage structures.

PLEASE BE ADVISED THAT THE CONTRACTOR MUST ACKNOWLEDGE RECEIPT OF ADDENDUM ONE, TWO, THREE AND FOUR ON THE BID SHEET SIGNATURE PAGE (PAGE 29).
